ANGELINA A

+91 9342189056 | angelinaraj131@gmail.com | github.com/Angelina2007-a | linkedin.com/in/angelina-raj-7a601633b/

PROFILE

Innovative and results-driven Software Developer & AI Enthusiast with a strong background in building automation systems and predictive models. Proven track record in hackathons and team leadership, specializing in Python, Computer Vision, and Cloud orchestration. Seeking to leverage technical skills to develop practical AI-based solutions.

EDUCATION

B.E. / Undergraduate Studies 2024 - Present
KGiSL Institute of Technology - Coimbatore, Tamil Nadu.
Artificial Intelligence & Machine Learning

PROJECT EXPERIENCE

Quantum Computing & Optimization Projects

- Designed a QUBO-QAOA-based approach for optimizing traffic signal timing under changing traffic conditions.

AI & Machine Learning Projects

- Engineered and Investigated AI-driven solutions including predictive models and computer vision applications.
- Worked on an AI-Driven HVAC Control System, Predictive Infrastructure Planner, and Gemini-Powered Image Editor.
- Applied Python and machine learning concepts to practical problem-solving.

IoT & Embedded Systems Projects

- Developed a Smart Surveillance & Inventory System integrating IoT sensors for real-time monitoring, surveillance, and inventory management.
- Investigated sensor-based systems and automation-oriented applications.
- Developing an AI-based system to classify hybrid and non-hybrid rice seeds.

Cloud & DevOps Project

- Built KubeScaleAI, a prototype focusing on the orchestration of AI workloads.
- Worked with Docker, Minikube, Linux environments, and Git / GitHub.

Scientific & Environmental AI

- Researching AI/ML applications for scientific data analysis, environmental monitoring, and real-world sensing systems.

Full-Stack AI Application

- Implemented web applications integrating APIs, interactive interfaces, maps, and AI-driven functionality.
- Created full-stack web applications using MongoDB, Express.js, React.js, and Node.js.

PROFESSIONAL SKILLS

- Python
- Machine Learning
- Computer Vision
- IoT Integration
- Full-Stack Web Development
- Docker & Minikube
- IoT IDEs

ADDITIONAL INFORMATION

- **Languages:** English (Proficient), Hindi (Basic), Tamil (Native)
- **Open Source:** NASA / astrobee and DS4SD / docling contributions
- **Certifications:** Open Source Contribution Excellence; AI-Driven Automation Specialist
- **Interests:** AI-driven automation for energy efficiency in commercial buildings
